

Y1 Spring Term 2 Parents Narrative

Enchanted woodland

As Historians we will... learn about the historical figure of Robin Hood and why he is famous. We will discuss whether we think he was a good or bad character and why.

As Geographers we will... practice the months of the year and be able to say them in order. We will learn about the seasons and how the weather in each season is different. To help us with our learning we will link our learning in science with our geography learning by thinking about how trees change in each season. We will learn how to use simple compass points and use ICT to investigate directions. We will draw and follow maps linked to our fairy tale forest work.

As Scientists we will... use flower fairies to learn different flowers names and try to grow our own plants by becoming flower experts. We will investigate what trees and plants are growing in our school grounds and use the quad as our very own garden. We will learn how to use graphs and charts to classify what we find in our garden. As experts we will be able to name some of the parts of a plant and explain these parts to others. We will work scientifically to ask and investigate scientific questions.

As Artists and Designers we will... use our art to help with our science learning by observing and drawing flowers accurately. We will use the artist Andy Goldsworthy as inspiration for our own natural artwork. As designers we will work in teams to design and make fairy gardens. We will design, make and evaluate flower fairy houses using a variety of materials.

As Responsible Citizens we will... begin to understand how to be safe on computers. We will start thinking about how we can look after our environments. We will create posters to help others to understand how to look after the environments.

As Enterprising Learners we will... the Team work twins work well together and we will continue to develop in this area. We will also learn how to be reflective learners by thinking what we can do next to become even better. We will plan an open event for our mums, dads and carers so that they can come and enjoy our learning with us.

As Mathematicians we will... be working on our understanding of shape and space. We will begin to use what we know to solve problems. We will be working on our number bonds and trying to learn these by heart. We will start to learn about fractions and explore finding halves and quarters of amounts and shapes.

As Readers we will... be continuing our phonics work. We will become experts at reading our alien language and if you look closely aliens may even invade the classroom! We will also be working on answering questions about what we have read to make sure we are understanding our books.
